

What's in the Air?

- With your partner/group define the term "air"
- What is Earth's air made of?
- Is this a large or small percentage of air?

- Each kind of object in the jar represents a different component of Earth's air.
 - How many different components make up Earth's air?
- Air is composed of 3 main components
 - 78% of Earth's air is nitrogen
 - 21% of Earth's air is oxygen
 - 1% represents the remaining air (mostly argon, but also contains carbon dioxide, neon, helium, sulfur dioxide, methane, and others)
